

Effective Monday, March 7, 2016, the number of copies for submittal documents will be reduced on applications that are reviewed by the Development Review Division of the Growth Management Department.

Revised land development applications defining the new number of copies required are available through the County website link: <http://www.colliergov.net/your-government/divisions-f-r/operations-regulatory-management/zoning-or-land-use-application/zoning-other-land-use-applications>

In order to make this a successful transition, the County needs your help by double checking to make sure that you are providing a CD with electronic copies (in .pdf format) of all submittal documents on these applications.

We look forward to working with you on this update to this business practice.
