- Linear perimeter footage was calculated to assist with future Request for Quotes (RFQ) so maintenance of rip rap in the lakes can be computed.

On completion of easement identification, a map will be constructed to graphically illustrate the location of the easements.

The goal of this effort is to determine which of the easements noted therein are recorded with the Clerk of Courts and what M.S.T.U’s assets may (or may not) be installed in these areas, and projected costs for maintenance, refurbishment, or replacement of these assets in coming years.

**Mr. Schumacher** will update the committee on progress at the March monthly meeting.
